Cloud Check

In partnership with

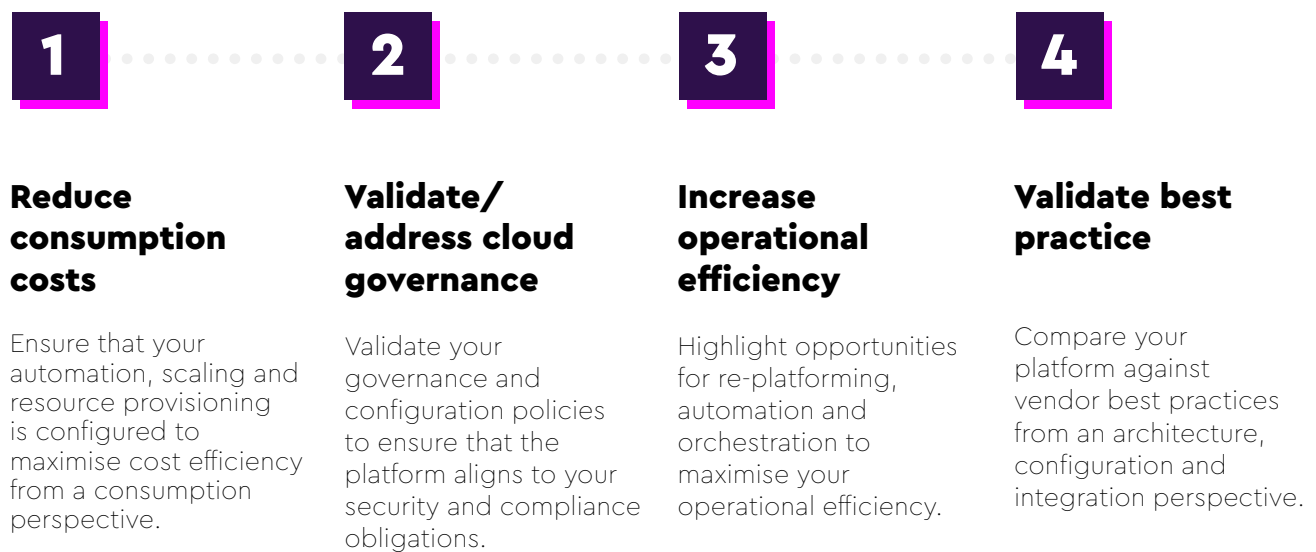

Think your cloud is well optimised? Think again.

You may be surprised to find there are almost always efficiencies to be made, no matter how lean you think you are.

Migrating to public cloud brings a whole host of benefits but if you've got security concerns or your cloud expenditure is spiralling out of control – it's time to adopt best practice and reduce platform spend. This can be easier said than done, but at ANS, we've got your back with our zero cost, no obligation check service.

Our cloud gurus will assess your cloud environment and provide a detailed architecture efficiency report with key recommendations to help you:

Customers who use our cloud check typically see :

- Up to 40% in cost reduction
- Over 20 governance issues addressed
- 10+ operational efficiency opportunities
- A roadmap to a vendor aligned best practice architecture

ANS check service highlighted key recommendation to help us reduce our platform spend by up to 40% per month. The assessment was invaluable to us and we're now confident that our cloud aligns to best practice.
