

How to Deploy Fabric

Our Technical Team is here to help, please reach out to Duncan.Sutcliffe@ans.co.uk if you have any questions

To take part in the event, there are a few prerequisites that need to be completed in advance. The two options below will show you how to deploy Fabric. When going through the process, please make sure you are Fabric Admins on your account.

The first link is a 60-day Fabric trial, which will give you access to an F64 SKU:

<https://learn.microsoft.com/en-us/fabric/fundamentals/fabric-trial>

The 2nd link will take you through a PAYG deployment. Here, you will need you to add card details, and you will be billed. Please select a F8 SKU for the event, nothing smaller.

<https://learn.microsoft.com/en-us/fabric/admin/fabric-switch>

If you already have a deployed PAYG capacity, we suggest you pause the capacity, so you do not incur spend. Please see here, how you can achieve this.

<https://learn.microsoft.com/en-us/fabric/enterprise/pause-resume>.

You will also need an internet connection in order to access Fabric during the workshop. ANS will provide credentials for our guest WiFi, but if you are using an organisational laptop, you should confirm with your administrators in advance that it will be able to join the network.

We will be sending some scripts by email in advance of the workshop. These contain Python code but are saved as text files with a .txt extension and will be contained in a zip file. If you cannot receive this type of content by email, please let us know so we can make alternative arrangements.

Best wishes
